MEDICINAL CROPS

For Medicinal Cannabis

01

In most of the societies, various parts of the Cannabis plant have been using as a medicine (such as in Ayurveda) in traditional treatments for wide variety of ailments such as asthma, epilepsy, fatigue, glaucoma, muscle pains and rheumatism.

02

Coco peat, also known as coir, is a popular growing medium for cannabis. Its excellent water holding capacity lets it retain a large amount of water, which is highly beneficial for cannabis plants.

03

After studying carefully, the crop requirements and their growing conditions in different climatic regions, Cocowide specially designed and developed several types of products for the growing of medicinal cannabis, either indoor or outdoor depending on the requirement.
